this clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present unlike most studies which assume that the rise of the west is the story of the coming of the modern world this history drawing upon new scholarship on asia africa and the new world and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment robert b marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime he explains its origins by emphasizing contingencies such as the conquest of the new world the broad comparability of the most advanced regions in china india and europe the reasons why england was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the united states emerged as a world power in the twentieth century and became the sole superpower by the twenty first

century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the anthropocene once again arguing that the us rise to global hegemon was contingent not inevitable marks also points to the resurgence of asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years

this clearly written and engaging book presents a global narrative of the origins of the modern world unlike most studies which assume that the rise of the west is the story of the coming of the modern world this history drawing upon new scholarship on asia africa and the new world constructs a story in which those parts of the world play major roles robert marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world and an escape from the biological old regime he explains its origins by emphasizing contingencies such as the conquest of the new world the broad comparability of the most advanced regions in china india and europe the reasons why england was able to escape from common ecological constraints facing all of those regions by the 18th century and a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world

the sequel and companion volume to c a bayly s ground breaking the birth of the modern world 1780 1914 this wide ranging and sophisticated study explores global history since the first world war offering a coherent comparative overview of developments in politics economics and society at large written by one of the leading historians of his generation an early intellectual leader in the study of world history weaves a clear narrative history that explores the themes of politics

economics social cultural and intellectual life throughout the long twentieth century identifies the themes of state capital and communication as key drivers of change on a global scale in the last century and explores the impact of those ideas interrogates whether warfare was really the pre eminent driving force of twentieth century history and what other ideas shaped the course of history in this period explores the causes behind the resurgence of local conflict rather than global scale conflict in the years since the turn of the millennium delves into the narrative of inequality a story that has shaped and been shaped by the events of the last hundred years part of the blackwell history of the world series the goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world it will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time the volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change each provides a systematic account of a very large subject but they are also both imaginative and interpretative the series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production

this book traces in a lucid manner the history of the modern period from the seven years war in europe to the formation of the united nations organization the period in between witnessed the american war of independence as well as the civil war the epochal french revolution the two phases of the industrial revolution the birth of capitalism socialism and marxism the orientation of china and japan and the two great wars the author has deftly maintained the sequence of the events as no event in history can stand in isolation

two monumental works on the nature of the modern age by Romano Guardini one of the most important Catholic figures of the 20th century this expanded edition of *The End of the Modern World* a search for orientation includes its sequel *Power and Responsibility* a course of action for the new age in both Guardini analyzes modern man's conception of himself in the world and examines the nature and use of power it is the principle of individual responsibility that weaves both works into a seamless comprehensive and compelling moral statement Guardini tirelessly argues that human beings are responsible moral agents possessed of free will and answerable to God and their fellow man on *The End of the Modern World* this book will cauterize the spirit of any man who reads it it will burn away that sentimentality with which so many today view the advent of the new order imagining as they do that a fully technologized universe can retain every significant cultural and traditional value sustained by the past Frederick D. Wilhelmsen founding editor of *Triumph* magazine and professor at the University of Dallas on *Power and Responsibility* if the characteristic of Hellenic civilization is to be summed up in the word *logos* the characteristic of our own is more exactly summed up in the word *power* the fact itself is a challenge to the wisdom of man one is grateful that Romano Guardini has taken up the challenge I highly recommend the book to all who are wise enough to know today's need to wisdom that is I recommend the book to every thoughtful mind John Courtney Murray S.J. architect of the Vatican II Declaration on Religious Liberty and author of *We Hold These Truths*

how do historians make sense of the spatial layeredness of the past Cyrus Schayegh argues that the modern world's ultimate socio-spatial feature is not the oft-studied processes of globalization or state formation or urbanization but rather the fast-paced mutually transformative intertwinements of cities regions states and global circuits

the tenth edition of a history of the modern world remains one of the most highly praised history texts ever published the new edition reflects the authors continuing search for historical perspectives on complex events of our age guided by the assumption that the events cultures and conflicts of the contemporary world are always rooted in long evolving processes of historical change book jacket

this collection explores the importance of regionalization and globalization to the world economy particularly questioning whether the world economy is characterized by increasing regionalization rather than globalization international contributors explore the processes in the pacific area the americas africa and europe and make an important contribution to current debates in development economics

a new and wide ranging study of christianity in scotland from the eighteenth century to the present the contributors include d w d shaw ian campbell kenneth fielding william ferguson barbara machaffie peter matheson john mccaffrey owen chadwick david thompson keith robbins andrew ross stewart j brown and george newlands topics encompass varieties of unbelief challenges to the westminster confession john baillie queen victoria and the church of scotland the scottish ecumenical movement the disestablishment movement and presbyterian catholic relations

it is no longer news that the western world is in a crisis a crisis that has spread far beyond its point of origin and become global in nature in 1927 ren gu non responded to this crisis with the closest thing he ever wrote to a manifesto and call to action the crisis of the modern world was his most direct and complete application of traditional metaphysical principles particularly that of the age of darkness preceding the end of the present world to social criticism surpassed only by the reign

of quantity and the signs of the times his magnum opus in the present work *gu non* ruthlessly exposes the western deviation its loss of tradition its exaltation of action over knowledge its rampant individualism and general social chaos his response to these conditions was not activist however but purely intellectual envisioning the coming together of western intellectual leaders capable under favorable circumstances of returning the west to its traditional roots most likely via the catholic church or under less favorable ones of at least preserving the seeds of tradition for the time to come

this thematic history of the world from 1780 to the onset of the first world war reveals that the world was far more globalised at this time than is commonly thought explores previously neglected sets of connections in world history reveals that the world was far more globalised even at the beginning of this period than is commonly thought sketches the ripple effects of world crises such as the european revolutions and the american civil war shows how events in asia africa and south america impacted on the world as a whole considers the great themes of the nineteenth century world including the rise of the modern state industrialisation and liberalism challenges and complements the regional and national approaches which have traditionally dominated history teaching and writing

the origins of the modern world offers a refreshing alternative to eurocentric histories by exploring the roles that asia africa and the new world played in creating the world we know today starting in 1400 it brings the saga of the modern world to the present considering how and why the united states emerged as a world power in the 20th century and why asia is experiencing resurgence now
